Journal of Muscle Research and Cell Motility **10**, 489–492 (1989)

INDICES TO VOLUME 10 (1989)

Subject index

Actin binding regions, myosin head, 10
Actin binding domain, α-actinin, 280
Actin filaments, cutting and capping, probing nucleation, 1
Actin filament elongation, condensation, oligomers, 275
Actin polymerization protein, gelsolin, BHK cells, 465
α-actinin, structure and function, 280
Actins, antigenic cross-reactivity, sequence, 135
ADP, crossbridge action, model, 181
ADP, pressure sensitivity, psoas muscle fibres, 113
Amino-acid composition, Ca-ATPase, sarcoplasmic reticulum, 229
Amphibian smooth muscle, myosin filaments, side polar, 206
AMPPNP, rigor, slip, striated muscle, 360
Anterior byssus retractor muscle, catch, electron microscopy, 297
Anterior byssus retractor muscle, native thick filaments, 124
Antigenic cross-reactivity, actins, sequence variability, 135
Anti-myosin antibodies, perinatal development, masseter muscle, 312
ATP binding site, myosin head, 10
ATP, crossbridge action, model, 181
ATP hydrolysis products, 10S conformation, smooth muscle myosin, 457
ATPase activity, native thick filaments, ABRM, 124
Avian skeletal muscle, C-protein isoforms, 369

BHK cells, gelsolin, isolation and characterization, 465
Bovine muscle, myosin light chain, 403

Caffeine, calcium releasing factor, sarcoplasmic reticulum, 427
Caffeine induced oscillations, skeletal muscle fibres, 437
Calcium ATPase, sarcoplasmic reticulum, thiol reactivity, 229
Calcium ATPase, sarcoplasmic reticulum, phosphorylation, 245
Calcium binding domain, α-actinin, 280
Calcium dependence, tetracaine and procaine, skinned fibres, 337
Calcium dependence, thick filaments, *Mytilus edulis* ABRM, 124
Calcium dependent actin polymerization, gelsolin, BHK cells, 465
Calcium induced oscillations, skeletal muscle fibres, 437
Calcium regulation, SH-1 modification, rabbit myosin, 25
Calcium releasing factor, sarcoplasmic reticulum, 427
Calcium transport, sarcoplasmic reticulum, frog skeletal muscle, 326
Caldesmon, amino acids, molecular weight determination, 95
Caldesmon, latch, smooth muscle contraction, 97
Caldesmon, smooth muscle thin filaments, immunolocalization, 101
Capping of actin filaments, probing nucleation, 1
Cardiac muscle, troponin I, developmental isoform, 85
Catch mechanism, ABRM, *Mytilus edulis*, electron microscopy, 297
Chicken cardiac muscle, troponin I, developmental isoform, 85
Compression, filament lattice, thick filament structure, 385
Condensation of small oligomers, actin polymerization, 275
Conformation, 10S, smooth muscle myosin, 457
Connectin (titin) and nebulin, immunocytolocalization, 446
Connectin (titin) and nebulin, skinned muscle fibres, 360
C-protein isoforms, avian skeletal muscle, 369
Crossbridge action, model, effects of ATP, ADP and Pi, 181

D600 paralysis, frog switch fibres, 473
Development, cat masseter muscle, immunocytochemical analysis, 312
Developmental isoform, myosin, *Xenopus* tail musculature, 290
Developmental isoform, troponin I, cardiac muscle, 85

E–F hand, calcium binding domains, α-actinin, 280

Fibre kinetics, modelling, 395
Fibre types, *Limulus* telson muscles, 53
Filament lattice, compression, thick filament structure, 385
Flexible region, myosin head, 10
Freeze-substituted ABRM, catch mechanism, electron microscopy, 297
Frog muscle fibres, sarcomere length, isometric tetani, 67
Frog sartorius muscle, thick filament structure, 385
Frog skeletal muscle fibres, caffeine-treated, 427
Frog skeletal muscle fibres, connectin and nebulin, 350
Frog skeletal muscle fibres, mechanical oscillations, 437
Frog skeletal muscle, sarcoplasmic reticulum, saponin, 326
Frog twitch fibres, D600 paralysis, 473

Gelsolin, BHK cells, isolation and characterization, 465

Histochemistry and isomyosins, tail musculature, *Xenopus*, 290
Histochemistry, morphology, *Limulus* telson muscles, 53
Histochemistry, succinate dehydrogenase, *Xenopus*, 221

IAEDANS, SH-1 modification, rabbit myosin, 25
Image analysis, smooth muscle thick filaments, 206
Image analysis, myosin rod, paracrystals, 34
Immunocytochemical analysis, cat masseter muscle, myosin, 312
Immunocytochemical analysis, rat skeletal muscle, myosin, 197

Immunocytolocalization, titin (connectin) and nebulin, 446
Immunoelectron microscopy, connectin (titin) and nebulin, 350
Immunolocalization, caldesmon, smooth muscle thin filaments, 101
Invertebrate actins, antigenic cross-reactivity, sequence, 135
Isometric tetani, sarcomere length, frog muscle fibres, 67
Isoforms, α-actinin, structure and function, 280
Isoforms, C-protein, avian skeletal muscle, 369
Isomyosins, tail musculature, *Xenopus*, 290

Latch, smooth muscle, tonic contraction, 97
Lattice, thick filament, compression, 385
Limulus telson muscles, fibre types, 53

Masseter muscle, immunocytochemical analysis, development, 312
Mechanical oscillations, caffeine, calcium, skeletal muscle, 437
Modelling fibre kinetics, 395
Molecular weight determination, caldesmon, 95
Morphology and histochemistry, *Limulus* telson muscle, 53
Motility, native thick filaments, ABRM, 124
Myosin, calcium regulation, SH-1 modification, 25
Myosin filaments, smooth muscle, side polar, 206
Myosin, gizzard, quasi-crystalline ordered aggregates, 413
Myosin head, functional sequences, 10
Myosin heavy chain isoforms, skeletal muscle fibres, 197
Myosin heavy chain isoforms, cat masseter muscle, 312
Myosin light chain, slow isoform, bovine muscle, 403
Myosin rod, paracrystals, 34
Mytilus edulis, catch mechanism, electron microscopy, 297
Mytilus edulis, native thick filaments, ATPase, motility, 124

Native thick filaments, ATPase, motility, ABRM, 124
Nebulin, connectin, skinned fibres, 350
Nebulin, titin, immunocytolocalization, 446
Nucleation, probing, cutting and capping actin filaments, 1

Oligomers, condensation, actin filament elongation, 275
Optical diffraction, myosin rod, paracrystals, 34
Optical diffraction, sarcoplasmic reticulum, 245
Optical diffraction, smooth muscle thick filaments, 206
Oxygen consumption, succinate dehydrogenase, *Xenopus*, 221

Paracrystals, myosin rod, 34
Phosphate, crossbridge action, model, 181
Phosphate, pressure sensitivity, psoas muscle fibres, 113
Phosphorylation, sarcoplasmic reticulum, Ca-ATPase, 245
Phosphorylation, regulatory light chain, gizzard myosin, 413
Phosphorylation, protein kinase C, thymus myosin, 379
Polymorphism, invertebrate actins, 135
Potassium, effect on scallop sarcoplasmic reticulum, 229
Pressure sensitivity, psoas muscle fibres, 113
Procaine, tetracaine, skinned fibres, free calcium, 337
Protein kinase C phosphorylation, thymus myosin, 379
Psoas muscle fibres, pressure sensitivity, 113

Quasi-crystalline ordered aggregates, gizzard myosin, 413
Quick-freeze apparatus, freeze substituted ABRM, 297

Rabbit myosin, calcium regulation, SH-1 modification, 25
Rabbit psoas muscle fibres, pressure sensitivity, active tension, 113
Rabbit psoas muscle fibres, titin and nebulin, localization, 446
Rabbit psoas muscle, slip, 360
Rat cardiac muscle, troponin I, developmental isoform, 85
Rat skeletal muscle, myosin heavy chain isoforms, 197
Relaxed frog sartorius muscle, thick filament, compression, 385
Rigor muscle, freeze-substituted ABRM, electron microscopy, 297
Rigor slip, striated muscle, AMPPNP, 360

10S conformation, smooth muscle myosin, 457

Saponin, calcium transport, sarcoplasmic reticulum, 326
Sarcomere length, frog muscle fibres, 67
Sarcoplasmic reticulum, calcium releasing factor, 427
Sarcoplasmic reticulum, calcium transport, frog skeletal muscle, 326
Sarcoplasmic reticulum, phosphorylation, Ca-ATPase, 245
Sarcoplasmic reticulum, tetracaine and procaine, 337
Sarcoplasmic reticulum, thiol reactivity, Ca-ATPase, 229
Scallop actin, antigenic cross-reactivity, 135
Scallop sarcoplasmic reticulum, phosphorylation, 245
Scallop sarcoplasmic reticulum, thiol reactivity, 229
Sequence alignment, α-actinin, structure and function, 280
Sequences of the myosin head, 10
Sequence variability, actins, antigenic cross-reactivity, 135
SH-1 modification, rabbit myosin, calcium regulation, 25
Side polar, myosin filaments, smooth muscle cells, 206
Skeletal muscle fibres, myosin heavy chain isoforms, 197
Skeletal muscle fibres, oxygen consumption, histochemistry, 221
Skinned muscle fibres, tetracaine and procaine, 337
Skinned muscle fibres, connectic and nebulin, 350
Slip, rigor, AMPPNP, striated muscle, 360
Slow fibres, bovine muscle, myosin light chain, 403
Smooth muscle, latch, tonic contraction, 97
Smooth muscle, myosin filaments, side polar, 206
Smooth muscle myosin, 10S conformation, 457
Smooth muscle, gizzard myosin, quasi-crystalline aggregates, 413
Smooth muscle thin filaments, caldesmon, 101
Succinate dehydrogenase, single muscle fibres, *Xenopus*, 221

Temperature dependence, 10S conformation, smooth muscle myosin, 457
Tetani, sarcomere length, frog muscle fibres, 67
Tetracaine and procaine, skinned fibres, free calcium, 337
Thick filament structure, lattice compression, sartorius muscle, 385
Thick filaments, fibres types, *Limulus* telson muscle, 53
Thick filaments, motility, *Mytilus edulis* ABRM, 124
Thin filaments, smooth muscle, caldesmon, 101

Thiol reactivity, sarcoplasmic reticulum, Ca-ATPase, 229
Thymus myosin, Protein kinase C phosphorylation, 379
Titin (connectin), nebulin, immunocytolocalization, 446
Titin (connectin), nebulin, skinned fibres, 350
Tonic contraction, latch, smooth muscle, 97
Troponin I, cardiac muscle, developmental isoform, 85
Twitch fibres, D600 paralysis, 473
Type 2 skeletal muscle fibres, myosin heavy chain isoforms, 197

Xenopus, histochemistry and isomyosins, tail musculature, 290
Xenopus, histochemistry, succinate dehydrogenase, 221
X-ray diffraction, filament lattice, frog sartorius muscle, 385
